

Your Child and Family

HCP - Health Care Program for Children with Special Needs - is a program that offers support and resources for you and your child with special health care needs, from birth to age 21.

Whatever the age of your child, you may have questions or concerns. You will face new challenges as your child grows. HCP will be with you along the way!

We are here to listen.

The HCP staff is excited to join you in putting together the pieces of the puzzle that fit best for your child and family. Connecting the various pieces can improve quality of life. This can lead to a more successful and fulfilling experience for everyone — at home, at school and in the community.

HCP staff is available to discuss concerns about:

- Everyday family life
- Siblings
- Behavior
- School and education
- Recreation and play
- Making friends
- Growing up
- Working toward independence

The HCP Care Coordination Team:

- Includes parents and professionals working together as partners
- Recognizes that the family has valuable expertise about their child
- Is designed to help with the challenges of parenting a child with special needs
- Builds on family strengths and is sensitive to issues and concerns

- Discuss feeding and nutrition concerns
- Discuss insurance questions
- Provide information about your child's development, including:
 - Hearing
 - Vision
 - Speech
 - Physical coordination
 - Social
 - Emotional

HCP Care Coordination

HCP Services at Tri-County Health Department

The HCP Care Coordination Team can:

- Provide information about health, health care systems, school planning, advocacy and preparing for a meaningful adult life
- Recommend sources for routine medical care for your child and family
- Guide and support you as you seek specialty medical care for your child
- Introduce you to resources in your community such as parent education and support groups
- Guide you as you develop your child's education plan
